

5th International Epilepsy Symposium
»New Insights into Epilepsy«

Dear colleagues and friends,

We cordially welcome you to the 5th International Epilepsy Symposium organized by the Epilepsy-Centers Bethel and Berlin-Brandenburg. This year, the Berlin group is happy to greet you in the capital of Germany.

We are glad to bid well-known speakers – epileptologists, neurologists, neuropsychiatrists, neuropsychologists, and geneticists – from distinguished academic institutions in The Czech Republic, Italy, The Netherlands, United Kingdom, and Germany welcome.

The Epilepsy Symposium offers high-quality scientific sessions discussing recent research developments on classification and semiology of seizures, and pharmacological and surgical treatments of epilepsies. Lectures on each of the topics are followed by workshops which allow for in-depth discussion of real-life cases.

In an “Epilepsy Surgery Conference”, at first, four speakers present new insights into presurgical diagnostic tools, then, these speakers discuss instructive surgical cases from their institutions.

We are looking forward to meeting you in March 2024 at the International Epilepsy Symposium in Berlin.
